Domestic Spares

Filters, membranes, fittings and parts for home purifiers

Overview

Keep your purifier performing with genuine replacement filters, membranes, fittings and other spares. Using the right spare at the right time keeps the water safe and protects the rest of the unit.

Send us a photo of your purifier or the part, or its model name, and we will confirm the match. We also advise on replacement intervals so filters are changed on time.

Key features

Genuine spares Filters, membranes and parts that fit properly.	**Fittings and small parts** Tubes, connectors, taps and more.
Easy ordering Phone or WhatsApp, with a photo.	**For many makes** Spares for common domestic purifier types.
Replacement advice Intervals for each filter stage.	**Service option** Book a visit if you prefer us to fit it.

Applications

Home purifiers • Offices • Shops • Institutions • Clinics • Guest houses

How it works

1. Identify	2. Confirm	3. Order	4. Fit
Send the purifier model or a photo of the part.	We confirm the exact spare and fit.	Order by phone or WhatsApp.	Fit the spare using our guidance, or book a service visit.

Care and handling

Change on time. Replace filters on schedule even when the water seems fine.
Sanitise. Wash hands and clean the housing before fitting new filters.
Flush. Flush new filters and the membrane as advised before drinking.

Typical values. Values are typical for the product family and given for guidance. Exact figures depend on the make and model supplied; ask us for the data sheet of the specific model.

Spare groups (typical)

Sediment filters	PP spun cartridges, 5 micron, 10 in
Carbon filters	GAC or carbon block, 10 in
RO membrane	Domestic 75 / 100 GPD thin-film composite
Post filters	Inline carbon or mineral cartridges
Fittings and parts	Tubing, quick connectors, taps, solenoid, pump, SMPS

Supply

Availability	Common items ex-stock; others on request
Ordering	Phone or WhatsApp, with a photo of the part

Spare parts range

Spare	Typical change interval	Purpose	Notes
Sediment filter	3 – 6 months	Removes particles	Change sooner in turbid water
Carbon filter	6 – 9 months	Removes chlorine and odour	Protects the membrane
RO membrane	1 – 3 years	Removes dissolved solids	Depends on feed water and use
Post carbon	9 – 12 months	Polishes taste	Final stage
Pump / SMPS / solenoid	As needed	RO unit parts	Match the model

Intervals are typical and depend on your water and usage.

To receive a recommendation, send us:

- Purifier brand and model
- Photo of the part or the old filter
- Size, if known
- Water source and TDS
